

GENERAL INFORMATION

1. **PURPOSE**

Electrical District No. 3 (ED3) created this manual to present information and general specifications relative to the introduction and use of electricity supplied from its lines. The manual is intended as a guide for making electrical installations or modifications, while protecting the interests of the Customer and complying with regulations, which experience has shown, are necessary for safe, adequate and satisfactory service.

2. **SCOPE**

The information and specifications included in this manual relate to conductors and equipment connecting ED3's electricity supply system to Customer premises, as well as other subjects associated with the supply of electricity that are of mutual interest to the Customer, architect, engineer and electrical contractor. ***It is not a complete set of rules governing the installation of electrical wiring and equipment.***
